Career Profile

Product leader with 9 years of experience building 0-to-1 learning products and scaling subscription EdTech. I own product strategy and roadmap for academies and learning platforms, and I lead a team across design, content and growth, using funnel analytics to decide what ships. Founder background gives me an ownership mindset and a habit of tying product decisions to revenue. I am strongest where a company is launching an academy, a learning platform or an education-led funnel with bank and fintech partners, and needs someone who has done it before.
